

Cristóbal de Jesús Coronel Chambé

Full Stack Developer | Frontend Developer

Tuxtla Gutiérrez, Chiapas, Mexico • cristobal.coronelchambe@outlook.com • 9613481926 • github.com/BenellT

■ Portfolio: cristobalchambe.netlify.app

Professional Summary

Full Stack and Frontend Developer with experience in web development, internal systems, and enterprise applications. Specialized in PHP (Laravel), JavaScript, React, TypeScript, and Node.js, with strong expertise in containerized environments using Docker and deployments on Linux servers. I have contributed to public and private sector projects, collaborating in agile teams using Git and Azure DevOps version control methodologies. Focused on code quality, scalability, and delivery of functional solutions.

Technical Skills

Languages: PHP, JavaScript, TypeScript, C#, HTML5, CSS3

Frameworks & Libraries: Laravel 8/12, React, Next.js, Node.js, Bootstrap 5, Tailwind CSS, .NET

Databases: SQL Server, MySQL, PostgreSQL

DevOps & Tools: Docker, Git, GitHub, Azure DevOps, Apache2

Methodologies: Agile development, version control, remote collaborative work

Currently Learning: Python, FastAPI

Languages: Spanish • English

Professional Experience

Junior Software Developer

Linces Telecom | Monterrey, Nuevo León (Remote) | April 2024 – December 2024

- Performed corrective maintenance and functional improvements to the company's existing website.
- Developed internal tools in Node.js and TypeScript to automate user management and billing processes.
- Collaborated remotely with the technical team on development and operations tasks, demonstrating asynchronous communication skills and self-management.

Full Stack Developer — Professional Internship

Secretaría Anticorrupción y Buen Gobierno | Tuxtla Gutiérrez, Chiapas | August 2025 – December 2025

- Developed an Inventory and Asset Control System using Laravel 12, PHP 8.4, JavaScript, and Bootstrap 5, centralizing the management of government assets.
- Implemented a containerized development environment with Docker, ensuring portability and consistency between local and production environments.
- Collaborated on the design of backend and frontend architecture, focused on system scalability and maintainability.
- Configured and deployed a Linux production server (Debian 12) with Apache2, enabling multiple simultaneous PHP versions.

Software Developer — Social Service

Secretaría de Infraestructura del Estado de Chiapas | Tuxtla Gutiérrez, Chiapas | January 2025 – July 2025

- Analyzed and developed internal system modules in C# .NET and JavaScript, oriented toward administrative and public works processes.
- Managed SQL Server databases: queries, data maintenance, and periodic backups.
- Participated in the migration of institutional systems, adapting existing modules to new technology platforms.
- Used Git and Azure DevOps for version control, branch management, and collaborative work under agile practices.

Education

Bachelor's Degree in Software Development and Technology Engineering

Universidad Autónoma de Chiapas | Tuxtla Gutiérrez, Chiapas | November 2025 — Degree in progress

Relevant Coursework: Object-Oriented Programming, Software Development Process Quality, Database Design and Administration, Web and Mobile Application Development.
