PROFESSIONAL SUMMARY

Frontend Developer focused on React and TypeScript, with hands-on experience delivering web applications in both public-sector and private-sector environments. I have built and deployed systems end-to-end — from component design to production Linux server configuration. I work well remotely, learn independently, and aim to contribute from day one.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Bootstrap 5, HTML5, CSS3

Backend: Node.js, PHP, Laravel 12, FastAPI (learning)

Databases: PostgreSQL, MySQL, SQL Server

DevOps: Docker, Git, GitHub, Azure DevOps, Apache2, Linux (Debian)

Languages: Spanish (native) · English (upper-intermediate, fluent technical reading)

WORK EXPERIENCE

Full Stack Developer — Professional Residency

Secretaría Anticorrupción y Buen Gobierno · Tuxtla Gutiérrez, Chiapas · Aug 2025 – Dec 2025

- Built an Inventory and Asset Management System using Laravel 12, PHP 8.4, JavaScript, and Bootstrap 5, centralizing asset tracking for multiple concurrent users across government departments.
- Configured and deployed a production Linux server (Debian 12) with Apache2 and parallel PHP version support — the first time the system ran in a live production environment.
- Set up a containerized environment with Docker, eliminating environment inconsistencies between development and production.
- Designed backend and frontend architecture with scalability and long-term maintainability as primary constraints.

Software Developer — Community Service

Secretaría de Infraestructura del Estado de Chiapas · Tuxtla Gutiérrez, Chiapas · Jan 2025 – Jul 2025

- Developed and maintained internal system modules in C# .NET and JavaScript supporting administrative workflows for public infrastructure projects.
- Managed SQL Server databases: complex queries, data maintenance, and periodic backups.
- Participated in institutional system migration, adapting existing modules to new platforms.
- Used Git and Azure DevOps for version control and collaborative work under an agile methodology.

Junior Software Developer

Linces Telecom · Monterrey, Nuevo León (Remote) · Apr 2024 – Dec 2024

- Built internal tools in Node.js and TypeScript to automate user administration and billing workflows, reducing manual work for the operations team.
- Delivered functional improvements to the existing web platform, collaborating asynchronously with the technical team.
- First fully remote role: demonstrated effective self-management and async communication in a production environment.

EDUCATION

B.Eng. in Software Development and Technology

Universidad Autónoma de Chiapas · Tuxtla Gutiérrez · Completed Nov 2025

FEATURED PROJECTS

Griot

Next.js · React · TypeScript · Tailwind CSS · shadcn/ui · 2026 · *Personal project*

Interactive multilingual vocabulary learning platform with 5 game modes (hangman, multiple choice, memory, scramble, speed round). Includes a custom dictionary, progress statistics, and a mobile-first design. Built with Next.js App Router, domain-driven separation, and reusable atomic components.

View project: [Griot · Frontend Developer · 2026](#)

TesloShop

React · TypeScript · Zustand · TanStack Query · React Hook Form · Radix UI · 2026 · *Personal project*

Modular e-commerce app with an admin panel. JWT authentication with role-based access, URL-synced filters, lazy loading, and code splitting. Strict feature-based architecture: client state with Zustand, server state with TanStack Query. Strict TypeScript throughout.

View project: [TesloShop · Frontend Developer · 2026](#)

Kanan

Laravel 12 · PHP 8.4 · MySQL · Bootstrap 5 · Docker · 2025 · *Team of 3*

Government asset management system that replaced Excel-based processes. Granular role-based access control (Spatie), full movement audit trail, and institutional PDF generation. Containerized with Laravel Sail for reproducible development environments.
